

## Allergies and Food Intolerance Policy

This policy is in line with the strategy of the school. Our purpose at Langley is to enable every young person to flourish and positively contribute with confidence. This is achieved by ensuring that the school is a community of opportunity and excellence. We celebrate achievement and encourage all pupils to take ownership, contribute, expect high standards and make good things happen for themselves and everyone around them. Policies give the framework and procedural guidance to allow this to happen.

This policy should be read in conjunction with the Safeguarding and whole school First Aid Policies. This policy applies to the Nursery.

Langley Prep School recognizes that there is a need to treat all pupils, whatever their age, gender, disability, religion, ethnicity or sexual orientation with respect and dignity when intimate care is given. The child's welfare is of paramount importance and his/her experience of intimate and personal care should be a positive one. It is essential that every pupil is treated as an individual and that care is given gently and sensitively: no pupil should be attended to in a way that causes distress or pain.

### Allergies and food intolerance

When a child starts at the setting, parents are asked if their child has any known allergies or food intolerance. This information is recorded on the registration form.

- If a child has an allergy or food intolerance, 01.1a Generic risk assessment form is completed with the following information:
  - the risk identified – the allergen (i.e. the substance, material or living creature the child is allergic to such as nuts, eggs, bee stings, cats etc.)
  - the level of risk, taking into consideration the likelihood of the child encountering the allergen
  - control measures, such as prevention from contact with the allergen
  - review measures
- **Health care plan** must be completed with:
  - the nature of the reaction e.g. anaphylactic shock reaction, including rash, reddening of skin, swelling, breathing problems etc.
  - managing allergic reactions, medication used and method (e.g. EpiPen)
- The child's name is added to the Dietary Requirements list.

- A copy of the risk assessment and health care plan is kept in the child's personal file and is shared with all staff and is also kept in the cook's Food Allergy and Dietary Needs file.
- Parents show staff how to administer medication in the event of an allergic reaction.
- Generally, no nuts or nut products are used within the setting.
- Parents are made aware, so that no nut or nut products are accidentally brought in.
- Any foods containing food allergens are identified on children's menus.

### **Oral Medication**

- Oral medication must be prescribed or have manufacturer's instructions written on them.
- Staff must be provided with clear written instructions for administering such medication.
- All risk assessment procedures are adhered to for the correct storage and administration of the medication.
- The setting must have the parents' prior written consent. Consent is kept on file.

For other life-saving medication and invasive treatments please refer to Administration of medicine.
