

Oral Health Policy

This policy is in line with the strategy of the school. Our purpose at Langley is to enable every young person to flourish and positively contribute with confidence. This is achieved by ensuring that the school is a community of opportunity and excellence. We celebrate achievement and encourage all pupils to take ownership, contribute, expect high standards and make good things happen for themselves and everyone around them. Policies give the framework and procedural guidance to allow this to happen.

This policy should be read in conjunction with the Safeguarding and whole school First Aid Policies. This policy applies to the Nursery.

Langley Prep School recognizes that there is a need to treat all pupils, whatever their age, gender, disability, religion, ethnicity or sexual orientation with respect and dignity when intimate care is given. The child's welfare is of paramount importance and his/her experience of intimate and personal care should be a positive one. It is essential that every pupil is treated as an individual and that care is given gently and sensitively: no pupil should be attended to in a way that causes distress or pain.

Oral health

The setting provides care for children and promotes health through promoting oral health and hygiene, encouraging healthy eating, healthy snacks, and tooth brushing.

- Fresh drinking water is always available and easily accessible.
- Sugary drinks are not served.
- In partnership with parents, babies are introduced to an open free-flowing cup at 6 months and from 12 months are discouraged from using a bottle.
- Only water and milk are served with morning and afternoon snacks.
- Children are offered healthy nutritious snacks with no added sugar.
- Parents are discouraged from sending in confectionary as a snack or treat.

Where children clean their teeth when at the setting

- Children are encouraged to brush their teeth as part of the daily routine. Teeth should not be cleaned for at least one hour after a meal as this can cause loss of enamel.
- Each child has their own toothbrush, which is stored individually to prevent accidental contact and cross contamination.
- A small amount of toothpaste is put onto a blue paper towel before applying to the brush to prevent cross contamination.

- Toothbrushes are cleaned at each session and sterilised weekly in Milton or similar disinfecting fluid.
- Toothbrushes are changed every three months and provided by parents.
- Oral hygiene activities are included in planning every three months when toothbrushes are changed.
- The setting co-ordinates with local oral health and ensure procedures are reviewed regularly, additional guidance from the local team may be added to this procedure.

Pacifiers/dummies

- Parents are *advised* to stop using dummies/pacifiers once their child is 12 months old.
- Dummies that are damaged are disposed of and parents are told that this has happened.
